RESEARCH CONTRACTS

Fédération Nationale de la Mutualité Française, Paris, France.

Wrote three reports: 1) Conflicts of Interest in the French Health Care System. 2) Physician Payment in the United States. 3) Influences on Physician Prescribing in The United States: Countering the Role of The Pharmaceutical Industry, 2001-2002

CURRENT RESEARCH PROJECTS

Medical Profession, Market & State: Physicians' Conflicts of Interest in France, the United States, & Japan. (book manuscript under review at university presses).

PUBLIC SERVICE

National/Governmental

U.S. Supreme Court. Co-organizer, Brief of Health Law, Policy, And Ethics Scholars As *Amici Curiae* In Support of Respondent, *Pegram v. Herdrich*, Fall 2000.

United States Congress, Committee on Ways and Means, Subcommittee on Health, Representative Pete Stark (D-Cal).

Invited to help draft legislation establishing a medical regulatory commission, 1998.

United States Food and Drug Administration, Scientific Advisory Board, Washington, D.C. Special member for policy on conflict-of-interest in clinical research. September 9, 1993.

United States Congress, Committee on Ways and Means, Subcommittee on Health,
Washington, D.C. Invited Testimony on H.R. 345, a bill to prohibit physician self-referral.
April 20, 1993.

National/International-Organizations

National Partnership for Women and Families. Washington, D.C., Fall 2005.

I wrote a memo that analyzed the impact on health care consumers of proposed regulations that would exempt certain funding of physicians from prohibitions under the Medicare anti-kickback statute and the Stark self-referral law. The memo was the basis of comments submitted by the consumer groups to the administrative agencies. The proposed regulations allowed certain funding or gifts of electronic medical record and prescribing technology.

National Academy of Sciences, Institute of Medicine. Washington, D.C.
Physicians and Professionalism, Presenter. December 2, 1997.

The Open Society Institute, New York, NY
Physicians and Social Responsibility.
Advised the foundation on establishing a new program on professionalism in medicine.
November 10, 1997.

National Academy of Sciences, Institute of Medicine, Washington, D.C.
National Roundtable on Health Care Quality
Commentator on paper on the role of incentives in quality of care. October 29-30, 1997.

National Academy of Sciences, Institute of Medicine, Washington, D.C.

Appendix B:
Selected Quotes from book review of Medicine, Money and Morals

"*Medicine, Money, and Morals* is about the effects of financial incentives on medical practice. It is not the first work to address these questions... But it is the best."

Henry T. Greely, J.D., *Journal of American Medical Association*

"A daring--and often exasperating--batch of [health care reform] proposals comes from Mr. Rodwin. While the White House tries to formulate its proposals...*Medicine, Money & Morals* offers innovative ideas about where to start."

George Anders, *Wall Street Journal*

"[A]dmirably researched and cogently argued...His findings and recommendations must be pondered by everyone concerned with quality in health care."

David J. Rothman, Ph.D. *Science*

"[*Medicine, Money and Morals*] addresses pressing issues... Rodwin...calls for standards of financial ethics for medicine."

Joseph P. Newhouse, Ph.D. *New York Times Sunday Magazine*

[S]plendidly articulated...Rodwin's excellent book... is ... the first systematic examination of financial conflicts of interest in the medical profession... Rodwin's proposals for reform deserve very serious consideration."

Lawrence O. Gostin, J.D., *The New England Journal of Medicine*

"Rodwin's litany of transgressions recorded in court cases and scandals is sufficient to give any physician pause...[A] provocative examination of cost containment incentives."

Christine K. Cassel, M.D., *Health Affairs*

"Concern with the issue of conflicts of interest is on the rise in all professions...Rodwin's book provides a detailed and compelling account of the pervasive nature of the problem as it exists in modern medicine. He skillfully compares conflicts of interest as they arise in medicine with parallel problems in other areas of human endeavor, such as law, public service, banking...His measured approach to...potential forms of regulation shows that he is sympathetic with many scholars who no longer see various forms of government regulation as a silver bullet."

Richard A. Epstein, J.D. *Perspectives in Biology and Medicine*

"[A] surprisingly readable book...[C]hallenges the medical profession, legislatures and courts to "create new institutions and rules to hold physicians to fiduciary standards that already exist in other fields...[P]rovides a clear-sighted and exhaustive review of the range of conflicts of interest by modern medical practice, and why we as patients, taxpayers, and policymakers should care."

Sidney M. Wolfe, M.D. Editor, *Public Citizen Health Research Group: Health Letter*

"*Money, Medicine, and Morals* is a theoretically sophisticated, empirically detailed account of conflicts of interest and the physician's role...[A]n impressive piece of work -- broad in its scope, clear in its objectives, confident of its findings, certain of the policy implications.

Charles L. Bosk, Ph.D., *The Journal of Legal Medicine*

"[A] major contribution to the legal, ethical, and health policy literature. [A] must-read for those seeking to understand the current health care crisis."

Timothy Stoltzfus Jost, J.D., *Journal of Health Politics, Policy and Law*

"*Medicine, Money & Morals* could hardly be more timely in the mid-1990's...Rodwin's work was instrumental in documenting the need for reform....In the brief period since this work was published Congress has been instrumental in accomplishing some of [his] recommendations."

Frances H. Miller, J.D. *Indiana Law Review*

"A thorough appreciation of the impressive body of information that Rodwin has assembled and analyzed here is essential to any serious attempt to rationalize America's health care industry. It will be hard for anyone who has read this book to talk blithely of 'making the market work' in the industry."

Nancy Dorfman *Ethics & Behavior*

[Rodwin's] critique is well documented and firmly stated....This book should be studied by ethics committees and should be used in courses in medical ethics.

Stewart Wolf, M.D. *Society*

"This [book] is a valuable new source of analysis and documentation for physicians, economists, politicians, lawyers, and entrepreneurs concerned with any of the distortions that conflicts may wreak on the quality and efficiency of medical care."

Annals of Internal Medicine

"Painstakingly scrutinizes medical practice in the USA, giving a fascinating insight into the dilemmas facing patients when medical decisions can affect the doctor's economic well being (income, status, employment), the success or otherwise of a practice, or the survival of a hospital."

Joe Collier, M.D., *The Lancet*

"Rodwin offers a thoughtful and thought-provoking volume. He places financial conflicts of interest at the center of moral issues facing contemporary American medicine. *Medicine, Money and Morals* is a "must read" for those concerned with the ethical implications of currently debated proposals for national health-care reform.

Sydney A. Halpern, Ph.D., *Contemporary Sociology*

"This book is a scholarly, insightful and exhaustive exploration of a critical, yet much overlooked, problem in health care."

Michael Grodin, M.D., *American Journal of Preventive Medicine*

"[R]eaders who have been, are, or will be patients should at least become acquainted with *Medicine, Money and Morals*. Those closely involved in any aspect of its subject should study it thoroughly."
William Beatty, *Booklist*

"A convincing case for resolving financial conflicts of interest that compromise the judgment of doctors and that bias the clinical choices they make...A constructive contribution--featuring a well-presented analysis as well as concrete proposals for reform--to the ongoing discussion of our national health-care crisis."

Kirkus Reviews

"Rodwin makes a compelling case for prohibiting the more extreme forms of conflicts of interest."

Chris Petrakos, *Chicago Tribune*
